

Mastery Level (ML) Codes: 1=Standard should be taught in depth; 2=Students need a basic foundation; 3=If time permits

ML	Expectation:	Sample Problem / Explanation	Pacing	Assessment	Resources
<i>Operations and Algebraic Thinking</i>					
<i>1.OA Represent and solve problems involving addition and subtraction</i>					
1	1. Use addition within 20 to solve word problems involving situations of adding to, putting together and comparing, with unknowns in all positions, e.g., by using objects, drawings, and equations with a symbol for the unknown number to represent the problem.	$x+4=10$; $4+3=x$; $7+x=12$			
1	2. Solve word problems that call for addition of three whole numbers whose sum is less than or equal to 20, by using objects, drawings, and equations with a symbol for the unknown number to represent the problem.				
1	3. Use subtraction within 20 to solve word problems involving situations of taking from, taking apart and comparing, with unknowns in all positions, e.g., by using objects, drawings, and equations with a symbol for the unknown number to represent the problem.	$x-4=10$; $4-3=x$; $7-x=4$			
<i>1.OA Understand and apply properties of operations and the relationship between addition and subtraction</i>					
1	4. Apply properties of operations as strategies to add and subtract.	If $8+3=11$ is known, then $3+8=11$ is also known. To add $2+6+4$, the second two numbers can be added to make a ten, so $2+6+4=2+10=12$.			
1	5. Understand subtraction as an unknown-addend problem.	Subtract $10-8$ by finding the number that makes 10 when added to 8.			
<i>1.OA Add and subtract within 20</i>					
1	6. Relate counting to addition and subtraction.	Counting by 2 to add 2.			

Mastery Level (ML) Codes: 1=Standard should be taught in depth; 2=Students need a basic foundation; 3=If time permits

ML	Expectation:	Sample Problem / Explanation	Pacing	Assessment	Resources
1	7. Add and subtract within 20, demonstrating fluency for addition and subtraction within 10.				
1	8. Use strategies such as counting on; making ten; decomposing a number leading to a ten; using the relationship between addition and subtraction; and creating equivalent but easier or known sums.	$2+6+4=2+10$ $3+5+7=3+7+5=10+5=15$ $12+7=10+2+7=10+9=19$			
1.OA Work with addition and subtraction equations					
1	9. Understand the meaning of the equal sign, and determine if equations involving addition and subtraction are true or false.	Which of the following equations are true and which are false: $6=6$ (T); $7=8-1$ (T); $5+2=2+5$ (T); $4+1=5+2$ (F)			
1	10. Determine the unknown whole number in an addition or subtraction equation relating three whole numbers.	Determine the unknown number. $8+?=11$; $5=?-3$; $6+6=?$			
Number and Operations in Base Ten					
1.NBT Extend the counting sequence					
1	1. Count to 120, starting at any number less than 120. In this range, read and write numerals and represent a number of objects with a written numeral.				
1	2. For numbers up to 120, read and write numerals and represent a number of objects with a written numeral.				
2	3. Identify ordinal positions through 12.	First (1st), second (2nd), etc.			
2	4. Recognize, identify, and count coins (pennies, nickels, dimes, and quarters).				
2	5. Determine value of coins up to 99 cents.				
2	6. Write money values using cent symbol.				
3	7. Determine equal coin values.				
2	8. Recognize, copy, and continue patterns.				
1.NBT Understand place value					
1	9. Understand that the 2 digits of a two-digit number represent amounts of tens and ones.				

Mastery Level (ML) Codes: 1=Standard should be taught in depth; 2=Students need a basic foundation; 3=If time permits

ML	Expectation:	Sample Problem / Explanation	Pacing	Assessment	Resources
1	10. Understand the following as special cases: a. 10 can be thought of as a bundle of ten ones - called a "ten." b. The numbers from 11 to 19 are composed of a ten and one, two, three, four, five, six, seven, eight, or nine ones. c. The numbers 10, 20, 30, 40, 50, 60, 70, 80, 90, refer to one, two, three, four, five, six, seven, eight, or nine tens (and 0 ones).				
1	11. Compare two two-digit numbers based on meanings of the tens and ones digits, recording the results of comparisons with the symbols $>$, $=$, or $<$.				
<i>1.NBT Use place value understanding and properties of operations to add and subtract</i>					
1	12. Add within 100, including adding a two-digit number and a one-digit number, using concrete models or drawings <u>and</u> strategies based on place value, properties of operations, <u>and/or</u> the relationship between addition and subtraction. Relate the strategy to a written method and explain the reasoning used.				
1	13. Add a two-digit number and a multiple of 10 using concrete models or drawings <u>and</u> strategies based on place value, properties of operations, <u>and/or</u> the relationship between addition and subtraction. Relate the strategy to a written method and explain the reasoning used.	$23+40=63$			
1	14. Understand that in adding two-digit numbers, one adds tens and tens, ones and ones; and sometimes it is necessary to compose a ten.	$37+24=61$ "carrying ten ones to the tens column"			

Mastery Level (ML) Codes: 1=Standard should be taught in depth; 2=Students need a basic foundation; 3=If time permits

ML	Expectation:	Sample Problem / Explanation	Pacing	Assessment	Resources
1	15. Given a two-digit number, mentally find 10 more or 10 less than the number, without having to count; explain the reasoning used.				
1	16. Subtract multiples of 10 in the range 10 - 90 from multiples of 10 in the range 10-90 (positive or zero differences), using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction. Relate the strategy to a written method and explain the reasoning used.	70-20=50			
Measurement and Data					
1.MD Measure lengths indirectly and by iterating length units					
1	1. Order three objects by length.				
1	2. Compare the lengths of two objects indirectly by using a third object.				
1	3. Express the length of an object as a whole number of length units, by laying multiple copies of a shorter object (the length unit) end to end.				
1	4. Understand that the length measurement of an object is the number of same-size length units that span the object with no gaps or overlaps. All measurements should equal only whole numbers.				
2	5. Distinguish between customary and metric units of measure.				
1.MD Tell and write time					
1	6. Tell and write time in hours and half-hours using analog and digital clocks.				
1.MD Represent and interpret data					
1	7. Organize, represent, and interpret data with up to three categories.				

Mastery Level (ML) Codes: 1=Standard should be taught in depth; 2=Students need a basic foundation; 3=If time permits

ML	Expectation:	Sample Problem / Explanation	Pacing	Assessment	Resources
1	8. Ask and answer questions about the total number of data points, how many in each category, and how many more or less are in one category than in another.				
Geometry					
1.G Reason with shapes and their attributes					
1	1. Distinguish between defining attributes (e.g., triangles are closed and three-sided) versus non-defining attributes (e.g., color, orientation, overall size).				
1	2. Build and draw shapes to possess defining attributes.				
1	3. Compose two-dimensional shapes (rectangles, square, trapezoids, triangles, half-circles and quarter-circles) to create a composite shape, and compose new shapes from the composite shape.				
1	4. Compose three-dimensional shapes (cubes, right rectangular prisms, right circular cones, and right circular cylinders) to create a composite shape, and compose new shapes from the composite shape.				
1	5. Partition circles and rectangles into two and four equal shares, describe the shares using the words halves, fourths, and quarter, and use the phrases half of, fourth of, and quarter of.				
1	6. Describe the whole as two of, or four of the shares.				
1	7. Understand for "half of" and "fourth of" that decomposing into more equal shares creates smaller shares.
