

Mastery Level (ML) Codes: 1=Standard should be taught in depth; 2=Students need a basic foundation; 3=If time permits

ML	Expectation:	Sample Problem / Explanation	Pacing	Assessment	Resources
<i>Operations and Algebraic Thinking</i>					
<i>2.OA Represent and solve problems involving addition and subtraction</i>					
1	1. Use addition within 100 to solve one- and two-step word problems involving situations of adding to, putting together, and comparing, with unknowns in all positions, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.				
1	2. Use subtraction within 100 to solve one- and two-step word problems involving situations of taking from, taking apart, and comparing, with unknowns in all positions, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.				
<i>2.OA Add and subtract within 20</i>					
1	3. Fluently add within 20 using mental strategies. By the end of Grade 2, know from memory all sums of two one-digit numbers.				
1	4. Fluently subtract within 20 using mental strategies.				
<i>2.OA Work with equal groups of objects to gain foundations for multiplication</i>					
1	5. Determine whether a group of objects (up to 20) has an odd or even number of members, e.g., by paring objects or counting them by 2's.				
1	6. Write an equation to express an even number as a sum of two equal addends.	$3+3=6$; $5+5=10$ $20=10+10$			
1	7. Use addition to find the total number of objects arranged in rectangular arrays with up to 5 rows and up to 5 columns.	By looking at an array of objects aligned in 3 rows and 4 columns, the total number of objects can be found by $3+3+3=12$.			

Mastery Level (ML) Codes: 1=Standard should be taught in depth; 2=Students need a basic foundation; 3=If time permits

ML	Expectation:	Sample Problem / Explanation	Pacing	Assessment	Resources
1	8. Write an equation to express the total number of objects in a rectangular array as a sum of equal addends.	If given an array of objects arranged in 3 columns and 2 rows, the total number of objects is $3+3=6$.			
2	9. Explore basic multiplication facts.				
<i>Number and Operations in Base Ten</i>					
<i>2.NBT Understand place value</i>					
1	1. Understand that the three digits of a three-digit number represent amounts of hundreds, tens, and ones.	706 equals 7 hundreds, 0 tens, and 6 ones.			
1	2. Understand that 100 can be thought of as a bundle of ten tens - called a "hundred."				
1	3. Understand that the numbers 100, 200, 300, 400, 500, 600, 700, 800, 900 refer to one, two, three, four, five, six, seven, eight, or nine hundreds (and 0 tens and 0 ones).				
1	4. Count within 1000.				
1	5. Skip-count by 5s, 10s, and 100s.				
2	6. Identify ordinal numbers through 31.				
1	7. Read and write numbers to 1000 using base-ten numerals, number names, and expanded form.				
1	8. Compare two three-digit numbers based on meanings of the hundreds, tens, and ones digits, using $<$, $+$, $>$ symbols to record the results of comparisons.				
<i>2. NBT Use place value understanding and properties of operations to add and subtract</i>					
1	9. Fluently add and subtract within 100 using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction.				
1	10. Add up to four two-digit numbers using strategies based on place value and properties of operations.				

Mastery Level (ML) Codes: 1=Standard should be taught in depth; 2=Students need a basic foundation; 3=If time permits

ML	Expectation:	Sample Problem / Explanation	Pacing	Assessment	Resources
1	11. Add and subtract within 1000, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method. Understand that in adding or subtracting three-digit numbers, one adds or subtracts hundreds and hundreds, tens and tens, ones and ones; and sometimes it is necessary to compose or decompose tens or hundreds.				
2	12. Mentally add 10 or 100 to a given number 100 - 900, and mentally subtract 10 or 100 from a given number 100-900.				
2	13. Explain why addition and subtraction strategies work, using place value and the properties of operations.				

Measurement and Data

2.MD Measure and estimate lengths in standard units

1	1. Measure the length of an object by selecting and using appropriate tools such as rulers, yardsticks, meter sticks, and measuring tapes.				
1	2. Measure the length of an object twice, using length units of different lengths for the two measurements. Describe how the two measurements relate to the size of the unit chosen.				
2	3. Estimate lengths using units of inches, feet, centimeters, and meters.				
1	4. Identify the most appropriate unit of measurement.				

Mastery Level (ML) Codes: 1=Standard should be taught in depth; 2=Students need a basic foundation; 3=If time permits

ML	Expectation:	Sample Problem / Explanation	Pacing	Assessment	Resources
1	5. Measure to determine how much longer one object is than another, expressing the length difference in terms of a standard length unit.				
2.MD Relate addition and subtraction to length					
1	6. Use addition and subtraction within 100 to solve word problems involving lengths that are given in the same units, e.g., by using drawings (such as drawings of rulers) and equations with a symbol for the unknown number to represent the problem.				
1	7. Represent whole numbers as lengths from 0 on a number line diagram with equally spaced points corresponding to the numbers 0, 1, 2, ..., ...				
2	8. Represent whole-number sums and differences within 100 on a number line diagram.				
2.MD Work with time and money					
1	9. Tell and write time from analog and digital clocks to the nearest five minutes, using a.m. and p.m.				
1	10. Solve word problems involving dollar bills, quarters, dimes, nickels, and pennies, using \$ and symbols appropriately.	If you have 2 dimes and 3 pennies, how many cents do you have?			
1	11. Determine equivalent coin values.	Two dimes and one nickel equal one quarter.			
2.MD Represent and interpret data					
2	12. Generate measurement data by measuring lengths of several objects to the nearest whole unit, or by making repeated measurements of the same object. Show the measurements by making a line plot, where the horizontal scale is marked off in whole-number units.				

Mastery Level (ML) Codes: 1=Standard should be taught in depth; 2=Students need a basic foundation; 3=If time permits

ML	Expectation:	Sample Problem / Explanation	Pacing	Assessment	Resources
1	13. Draw a picture graph and a bar graph (with single-unit scale) to represent a data set with up to four categories.				
2	14. Extend repeating patterns.				
2	15. Solve simple put-together, take-apart, and compare problems using information presented in a bar graph.				
<i>Geometry</i>					
<i>2.G Reason with shapes and their attributes</i>					
1	1. Recognize and draw shapes having specified attributes, such as a given number of angles or a given number of equal faces.				
1	2. Identify triangles, quadrilaterals, pentagons, hexagons, and cubes.				
1	3. Partition a rectangle into rows and columns of same-size squares and count to find the total number of them.				
1	4. Partition circles and rectangles into two, three, or four equal shares. Describe the shares using the words, halves, thirds, half of, a third of, etc., and describe the whole as two halves, three thirds, four fourths. Recognize that equal shares of identical wholes need not have the same shape.
